

INFINITE PAPERLESS EDI

Infinite EDI Suite facilitates the exchange of trading documents (e.g. POs, delivery notes, ASNs, returns, invoices) between suppliers and buyers.

Depending on your current business needs, Infinite EDI Suite is available in two comprehensive versions: integrated EDI and web EDI.

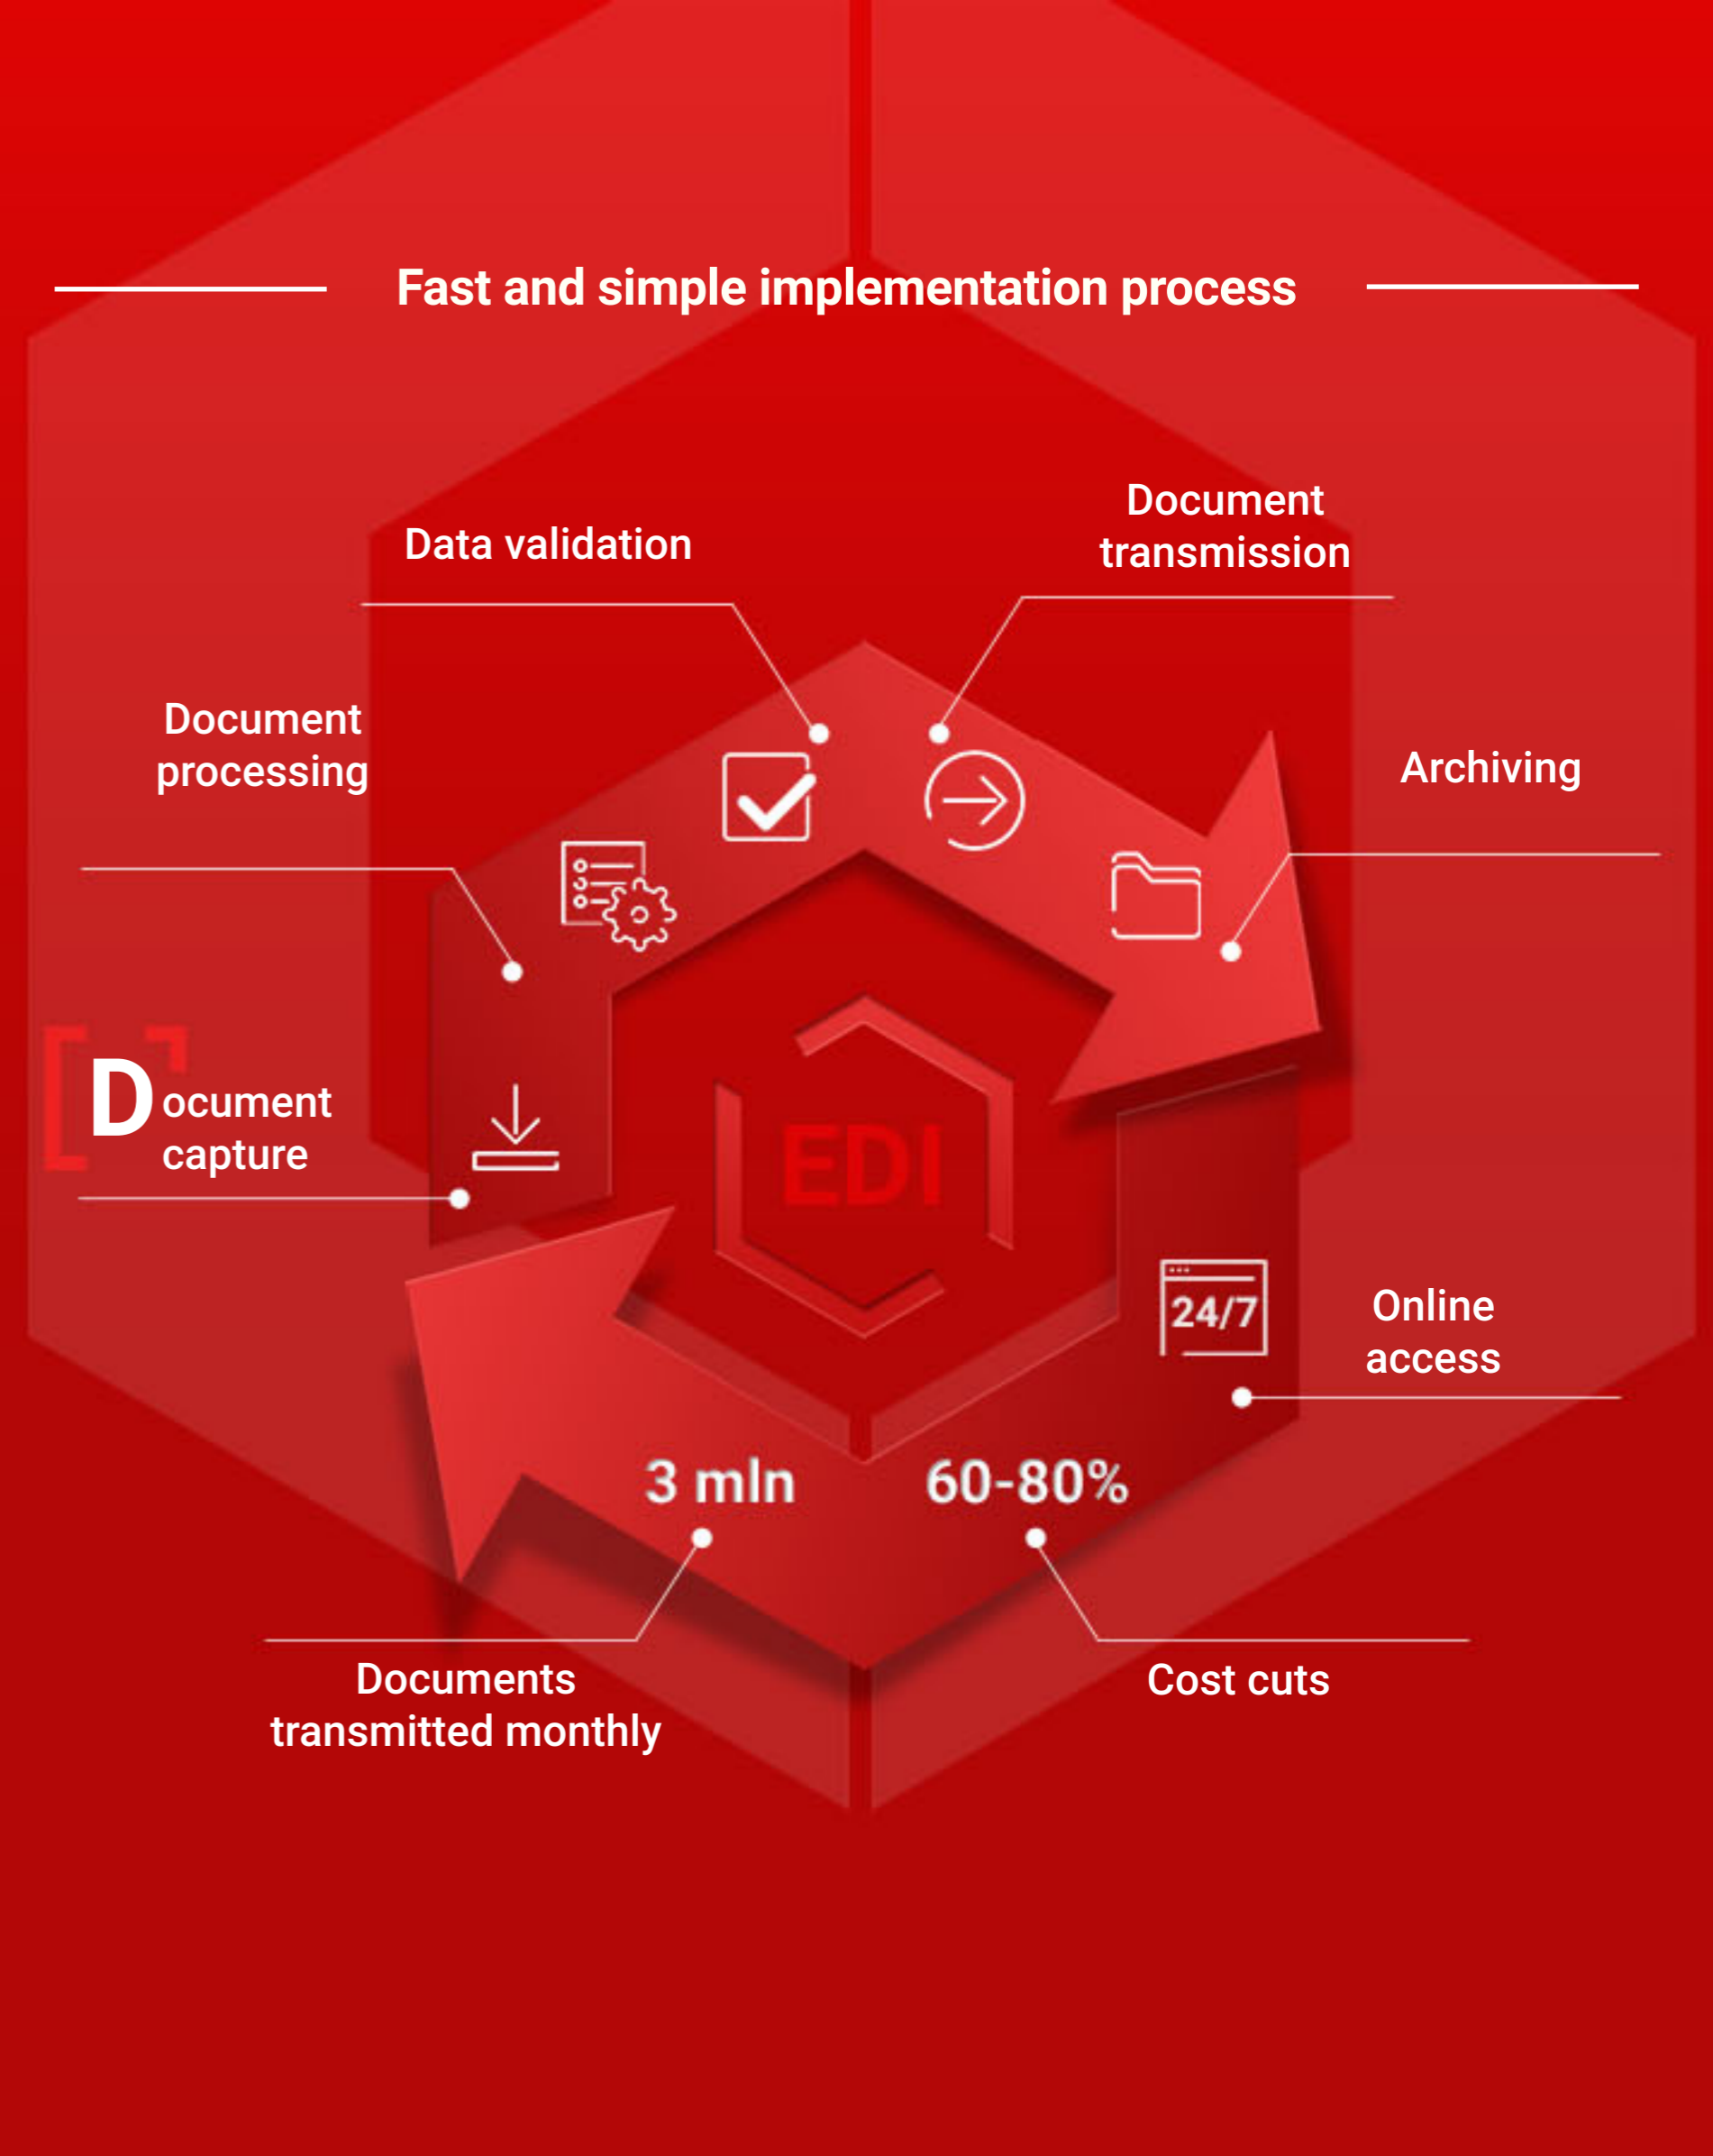

1 Integrated EDI

With integrated EDI, the entire data flow is integrated with your ERP software. The solution connects business partners, regardless of the message format or communication channel in place.

WEB EDI

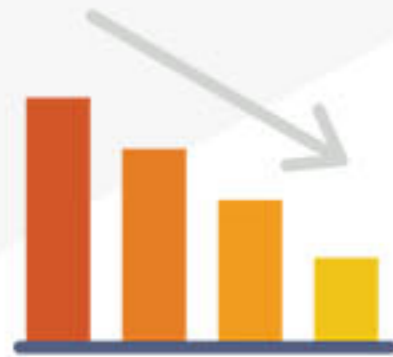

Web-based EDI is designed to conduct Electronic Data Interchange through an Internet browser. With web EDI, you are not required to install any EDI software or adopt ERP solutions. You can easily connect to business partners worldwide and exchange transaction documents via the web portal.

2

Fully automated document exchange:

- faster document processing
- no errors arising from manual data entry
- no duplicated data
- no documents lost

Cost cuts:

- document processing (print-out, mailroom, post)
- document management and storage
- administrative burden

Flexible EDI Solutions to fit your needs:

- ✔ B2B integration capabilities e.g. SAP, Oracle, Microsoft Dynamics, Sage
- ✔ Various communication methods e.g. AS2, SFTP, FTP/VPN, WebServices
- ✔ Various document formats e.g. EDIFACT, XML, CSV, txt, in-house formats
- ✔ Global initiatives e.g. GS1, Oracle Partner Network
